Contents

Introduction to The Neurosciences and Music V: Cognitive Stimulation and Rehabilitation
Emmanuel Bigand and Barbara Tillmann

1. Keynote address
Cognitive plasticity in older adults: effects of cognitive training and physical exercise
Louis Bherer

2. Musical rhythm and language development: basic research and implications for rhythm-based interventions
Multimodal imaging of temporal processing in typical and atypical language development
Ioulia Kovelman, Neelima Wagley, Jessica S. F. Hay, Margaret Ugolini, Susan M. Bowyer, Renee Lajiness-O’Neill and Jonathan Brennan
Perspectives on the rhythm–grammar link and its implications for typical and atypical language development
Reyna L. Gordon, Magdalene S. Jacobs, C. Melanie Schuele and J. Devin McAuley

3. Temporal expectations in a developmental perspective
Neuronal oscillations as a mechanistic substrate of auditory temporal prediction
Benjamin Morillon and Charles E. Schroeder
Short- and long-term rhythmic interventions: perspectives for language rehabilitation
Daniele Schön and Barbara Tillmann

4. The beat: a structured environment for movement, communication, and socialization
Motor responses to a steady beat
Rebecca S. Schaefer and Katie Overy
Rhythm and interpersonal synchrony in early social development
Laurel J. Trainor and Laura Cirelli
Familiarity with music increases walking speed in rhythmic auditory cuing
Li-Ann Leow, Cricia Rinchon and Jessica Grahn
Can rhythmic auditory cuing remediate language-related deficits in Parkinson’s disease?
Sonja A. Kotz and Thomas C. Gunter

5. Moving on the beat of music: bridging training, rehabilitation strategies, and technology
Moving with music for stroke rehabilitation: a sonification feasibility study
Daniel S. Scholz, Sönke Rhode, Michael Großbach, Jens Rollnik and Eckart Altenmüller
Effects of musically cued gait training in Parkinson’s disease: beyond a motor benefit
Simone Dalla Bella, Charles-Etienne Benoit, Nicolas Farrugia, Michael Schwartze and Sonja A. Kotz
Alignment strategies for the entrainment of music and movement rhythms
Bart Moens and Marc Leman
Sound-induced stabilization of breathing and moving
Benoît G. Bardy, Charles P. Hoffmann, Bart Moens, Marc Leman and Simone Dalla Bella
6. Individual differences in movement coordination: effects of training, aptitude, and neurological disorders
   *Modeling effects of cerebellar and basal ganglia lesions on adaptation and anticipation during sensorimotor synchronization*
   M.C. (Marieke) van der Steen, Michael Schwartze, Sonja A. Kotz and Peter E. Keller

   *Impaired movement timing in neurological disorders: rehabilitation and treatment strategies*
   Michael J. Hove and Peter E. Keller

   *Acquisition and reacquisition of motor coordination in musicians*
   Shinichi Furuya and Eckart Altenmüller

   *Associations between motor timing, music practice, and intelligence studied in a large sample of twins*
   Fredrik Ullén, Miriam A. Mosing and Guy Madison

7. Dance and the brain: a new window into the study of brain plasticity
   *Dance experience sculpts aesthetic perception and related brain circuits*
   Louise P. Kirsch, Kelvin Dawson and Emily S. Cross

   *Dance and the brain: a review*
   Falisha J. Karpati, Chiara Giacosa, Nicholas E.V. Foster, Virginia B. Penhune and Krista L. Hyde

8. Musical expertise and more?
   *Music training and inhibitory control: a multidimensional model*
   Sylvain Moreno and Faranak Farzan

   *Promises of formal and informal musical activities in advancing neurocognitive development throughout childhood*
   Vesa Putkinen, Mari Tervaniemi, Katri Saarikivi and Minna Huotilainen

   *Emergence of biological markers of musicianship with school-based music instruction*
   Nina Kraus and Dana L. Strait

   *Music training and speech perception: a gene–environment interaction*
   E. Glenn Schellenberg

9. The role of music in promoting infants’ well-being: clinical and research perspectives
   *NICU music therapy: song of kin as critical lullaby in research and practice*
   Joanne Loewy

   *Musical affect regulation in infancy*
   Sandra E. Trehub, Niusha Ghazban and Mariève Corbeil

10. Music and emotion: implications for therapy and rehabilitation
    *Music-evoked emotions: principles, brain correlates, and implications for therapy*
    Stefan Koelsch

    *Musical pleasure and reward: mechanisms and dysfunction*
    Robert J. Zatorre

    *Music and emotions: from enchantment to entrainment*
    Patrik Vuilleumier and Wiebke Trost

11. Music cognition in dementia
    *Preservation of musical memory and engagement in healthy aging and Alzheimer’s disease*
    Lola L. Cuddy, Ritu Sikka and Ashley Vanstone

    *Functional MRI of music emotion processing in frontotemporal dementia*
    Jennifer L. Agustus, Colin J. Mahoney, Laura E. Downey, Rohani Omar, Miriam Cohen, Mark J. White, Sophie K. Scott, Laura Mancini and Jason D. Warren

    *Musical tasks targeting preserved and impaired functions in two dementias*
    Andrea R. Halpern, Hannah L. Golden, Nadia Magdalinou, Pirada Witoonpanich and Jason D. Warren

    *Efficacy of musical interventions in dementia: methodological requirements of nonpharmacological trial*
    Sérèvine Samson, Sylvain Clément, Pauline Narme, Loris Schiaratura and Nathalie Ehrlé

12. Musical applications: workshops
    *Music therapy with disorders of consciousness: current evidence and emergent evidence-based practice*
    Wendy L. Magee and Julian O’Kelly

    *Neurological and developmental approaches to poor pitch perception and production*
    Psyche Loui, Steven M. Demorest, Peter Q. Pfordresher and Janani Iyer
